

Brushless Torque Motors

HT Series High Torque Brushless Torque Motors

High Torque Density, Sinusoidal BEMF, Frameless

Allied Motion's **HT (High Torque) series of frameless brushless torque motors** are available in nine diameters from 19.3 mm (0.76 in) up to 127 mm (5 in). Each frame series is available in up to six stack lengths, enabling designers to choose from a number of performances in each series.

Continuous stall torque ratings range from 0.007 Nm (1.0 oz-in) up to 9 Nm (1277 oz-in). Winding voltage is 24 V and 100 V for the largest two frame sizes. Integral Hall effect commutation sensors are provided as standard, and require no setup on the part of the user.

The standard HT series motors are especially well suited for direct integration into applications that demand high power density motors with minimum size, weight, and inertia. Non-standard models of the HT series are also available in stator diameters up to 239 mm (9.42 in).

Typical applications for the HT series are semiconductor manufacturing equipment, medical systems, including life support, robotic systems, laser sighting and control, and cryogenic cooling pumps, to name a few.

Features & Benefits

- Frameless high torque-to-inertia motors with continuous stall torque rating up to 9 Nm (1277 oz-in)
- Frame diameters from 19.3 mm (0.76 in) to 127mm (5 in)
- Continuous power ratings from 7 W up to 665 W
- Class F (155 °C) winding insulation temperature rating
- Rare-earth neodymium iron boron magnets as standard
- Integral hall-effect commutation sensors as standard

Options

- Samarium Cobalt magnets for very high temperature environments.
- Available non-standard designs with stator diameter up to 239 mm (9.42 in)
- Alternate winding voltages
- Housed versions with feedback (encoder or resolver)
- Custom design versions

- High torque density frameless brushless motors
- Continuous stall torque from 0.007 Nm (1.0 oz-in) through 9 Nm (1277 oz-in)
- Continuous power ratings from 7 W through 665 W.
